End of the season playoff scenarios:

- 4 different winners, round robin playoff
- One team wins 2 quarters and different team wins 2 quarters, one game playoff.
- One team wins 2 of the quarters and two different teams wins 1 quarter each, then teams that won 1 quarter have playoff; winner of that must beat the team that won two of the quarters twice.
- If one team wins 3 of the quarters and a different team wins 1 quarter, the team that only won 1 must beat the team that won 3 quarters three times.
